Isten hozott.

Winter is a time for reflection. A time to look at our lives and learn from the past to improve our futures. To keep positive aspects from the past and incorporate them to move us forward.

Winter contains the energy of the North. It is a time connected to the colors black and green; representing power, focus will power, money and health. You can utilize these abilities now.

The energies are connected to the earth at this junction. So it is dry and cold now. In a rest period. This is a great time to rest your body and mind.

The sign of Taurus is now dominant. This makes it a good time to do anything connected with organizing, working with details and patience.

The word “winter” equates to the number eight (8), which attracts finance and spirituality. Manifest money and money opportunities now through spiritual thinking and dealing.

You can work with gnomes because of their nature. They can be called upon for help with anything connected to the Earth, money and property.

When you call in the Angels, call on “Archangel Uriel.” Winter has a strong pull for this archangel.

Remember to work with nature by knowing what abilities are enhanced at this time.

May God Bless You Abundantly, Maria
